RESPONSE BRANCH**

RE: Pagel's Pit, Rockford, IL

Dear Sir or Madam:

This letter is in response to your July 15, 1985, letter requesting information concerning hazardous wastes generated, stored, treated, transported, disposed, or otherwise handled by Dean Foods Company-Rockford, in regard to Pagel Pit.

We do not believe Dean Foods-Rockford has ever stored, transported or disposed of any hazardous material in Pagel Pit.

A review of our records indicate that permits were obtained by Rockford Blacktop Construction Company for Dean Foods-Rockford for the transport and disposal of milk fat from the grease trap (Illinois Environmental Protection Agency Permit No. 74-124 and 78-214), disposal of ammonia-oil solution (IEPA Permit No. 1972-24 and Supplemental Permit No. 74-153) and PDDI (IEPA Permit No. 77-1491). PDDI is cottage cheese whey that has been deionized and condensed. Copies of these permits are enclosed.

Recent correspondence from Winnebago Reclamation Service, Inc., indicates that Permits #77-1491 and 78-214 were not used. Correspondence from Winnebago Reclamation Service, Inc., dated March 10, 1980, indicates that Permits #74-124 and 74-153 were used and 26.85 tons of material were received by Pagel Pit. We have no records to verify this number. Copies of this correspondence are enclosed.

We have no record of the transporter of any material that may have been disposed of in Pagel Pit. We believe the transporter was probably Frinks Sewer Service as stated in the application for the permits.

We have also enclosed an analysis of the PDDI, Permit No. 77-1491 and of the milk fat waste, Permit No. 74-124 and 78-214.

DMC-0002

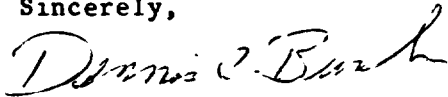

U.S. Environmental Protection - 2 -
Agency - Region V
Waste Management Division
Chicago, IL 60604

September 22, 1985

The information that Dean Foods has is very sketchy. Most of this information has come from Winnebago Reclamation Service. We have never had a permit to dispose of any material that would be considered hazardous.

If you have any questions concerning this matter, please contact me in Rockford.

Sincerely,

Dennis C. Busch
Director, Environmental Control

John H. Hetrick
Dean Foods Company
1126 Kilburn Avenue
Rockford, Illinois 61101

Dear Mr. Hetrick:

I have enclosed two (2) copies of the PDDI permit that I received from the E.P.A.

I have reapplied for a permit for the grease trap cleanings (copy enclosed). The charge of \$14.58 per ton would be the same for each.

Please be sure that what you send me is what is described on the application.

Sincerely yours,

C. J. HOWARD

DEAN FOODS COMPANY

1126 KILBURN AVENUE • ROCKFORD, ILLINOIS • 61101
TELEPHONE (815) 962-0647

November 8, 1977

Mr. Chuck Howard
Rockford Blacktop Construction Company
600 Boylston Street
Rockford, Illinois 61111

Dear Mr. Howard:

We have Illinois EPA permits for land disposal of our grease trap material from the grease traps at our Pecatonica and Rockford facilities. We are enclosing copies of these permits.

Because there are times when we can't dispose of this waste on land because of recent rainfall or soil conditions, we are seeking an emergency permit to dispose of this material in your landfill. This material consists of food material of a fatty nature and settleable food solids which are retained in the grease trap through which the plant water flows on the way to the municipal sewer. It contains no materials of a toxic nature such as heavy metals, but the material is of a nature (primarily because of the fat) that the municipal sanitary districts do not want it in their system.

In connection with the start up of our PDDI operation, we may occasionally have some concentrated whey for which we would also like to have an emergency permit to dispose of this material in your landfill. This material would test about 50% solids (all whey solids - 76% lactose, 13% protein and 8% ash on solids basis). As you know, this is a by product of cheese manufacture, containing no toxic materials. We would not have over 2,000 gal. in any one week to dispose of and we hope to have little or nothing when our PDDI process is perfected.

If you need further information to get the required permits from the EPA, please let me know.

Sincerely yours,

John H. Hetrick
Director, Environmental Control

Rockford Blacktop Construction Co.
600 Boylston Street
Loves Park, Illinois 61111

Gentlemen:

Supplemental permit is hereby granted to Rockford Blacktop Construction Co. to accept for one-time disposal 200 gallons of a thin ammonia-oil solution generated by Dean's Milk Co. all in accordance with the plans prepared by Charles J. Howard, Landfill Manager, dated October 11, 1974 and received by the Agency on October 15, 1974. This supplemental permit is further subject to the following special condition:

The ammonia-oil solution shall be mixed with the general refuse and covered immediately to minimize odor and nuisance problems.

Except as modified in the above documents, the site shall be operated in accordance with the terms and conditions of Permit No. 1972-24 dated April 7, 1972.
